

FLEXBAND® MULTI FROM ARTELON ANCHOR SYSTEM

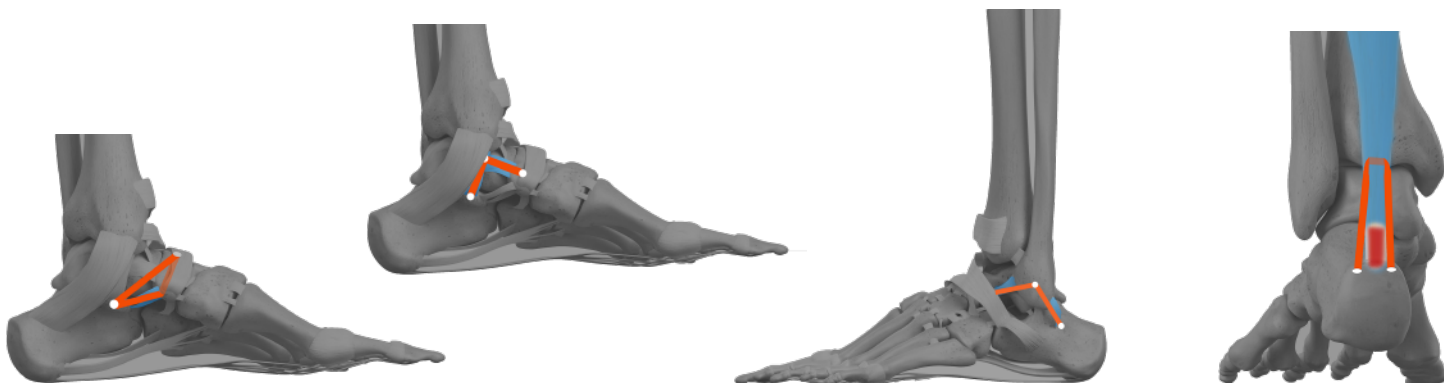

THE MULTI-TOOL FOR MULTIPLE LIGAMENTS

Re-tension, reinforce, and biologically restore multiple ligament structures with one system. Artelon's FLEXBAND® Multi System offers 24 cm of FLEXBAND for more complex reconstructions.

RECONSTRUCTIVE VERSATILITY

24 CM STRONG & ELASTIC

BIOLOGICAL RESTORATION

NOT JUST A BRACE, A RESTORATION. Artelon's Dynamic Matrix technology was uniquely designed as a non-inflammatory matrix that is capable of quickly integrating with regenerating connective tissue¹. Once integrated, FLEXBAND technology shares in tensile loading to both protect the healing construct and drive the mechanical stimulation required for optimal tissue regeneration and remodeling¹. Over 4-6 years, the matrix is replaced by highly organized type-1 collagen².

ORDERING

FLEXBAND® MULTI
FROM ARTELON

P/N 71016

3.85x17mm PEEK Interference Eyelet Screw	x 2
0.5x24cm FLEXBAND Plus Dynamic Matrix	x 1
Cannulated Drill Bit	x 1
1.4mm Guide Wire	x 2
1.4mm Guide Wire with Nitinol Passing Loop	x 1

ACCESSORIES

P/N 81001	3.85 x 17mm Anchor with Driver	x 1
P/N 91001	3.85 x 17mm Anchor no Driver	x 1
P/N 91002	5.0 x 17mm Anchor no Driver	x 1
